

Eliminate paper and keep your staff informed

Digital shift scheduling allows team members to be notified and view their schedule from anywhere

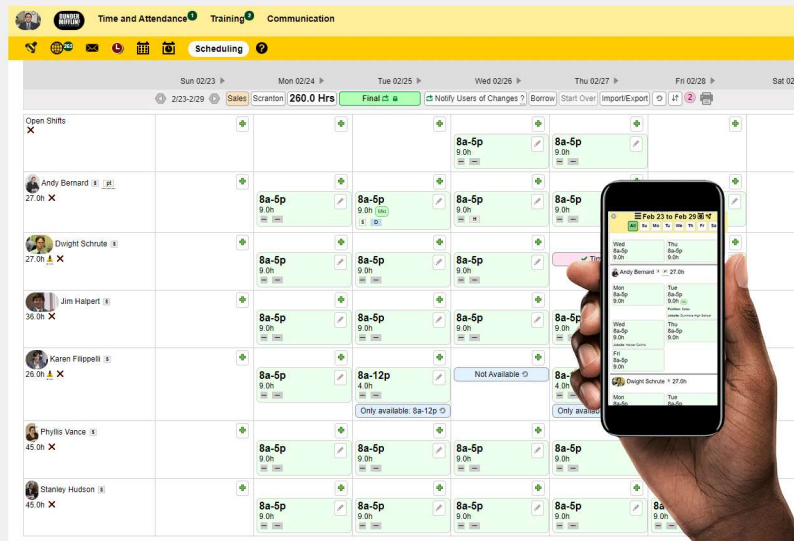

Problem:

Paper schedules require team members to be on site to receive them. They can be easily misplaced and require reprinting every time a shift swap occurs.

Solution:

honeybeeBase employee scheduling allows managers to create digital schedules that team members can view from their computer tablet or phone. This eliminates the need for paper and allows team members to receive real time updates when changes are made.
