

# beeMail

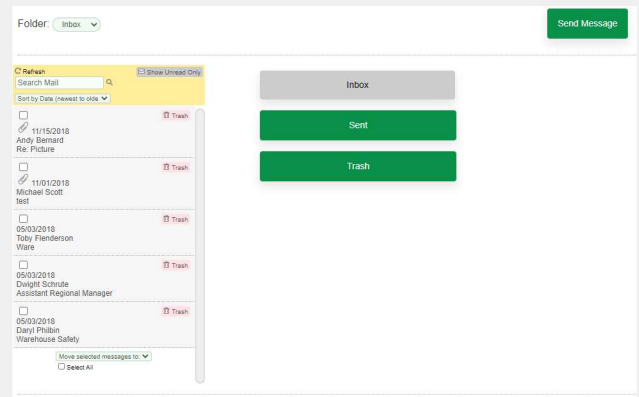

Internal private messaging

## Problem:

Supervisors need a way to communicate with their staff without the need for company email or keeping track of personal email addresses.

## Solution:

honeybeeBase beeMail provides an internal private messaging system that works similar to email but uses usernames to communicate.

## Key Features

- Acts as internal messaging that doesn't require email or phone numbers
- Can be sent to one or multiple users
- Can be setup to send to your email address with the ability for you to reply directly through your email
