Time Tracking

Easy Accessibility, Unlimited Locations

Access from any device with an internet connection and a browser including desktop, tablet, and phone. Custom settings also allow you to restrict this access per user, position, location or team wide if needed. Account includes unlimited locations, allowing you to set up time clock rules and assign your staff to each location as needed.

GPS Location

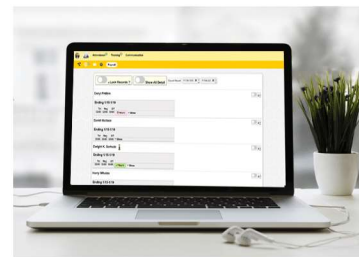

Location coordinates can be tracked and/or required for employees clocking in and out on the app. Available in the App store and Google Play Store.

Real-Time Notifications

Know when your staff has started their shift, started their breaks, or left for the day with real-time notifications. These can come via text, email, or through the website. Notifications are also customizable to email you immediately or in a summarized report at the end of the day.

Custom Exporting

Create custom spreadsheet exports of hours worked and paid time off to send to your payroll processor. Integrations exist for Quickbooks and Gusto.

Reduce your time and headache managing your team with one easy to use app?

Yes please!
